

### Description

Polytec DTM Semi-Gloss is a premium plus exterior, single component, high performance architectural and light industrial coating, which is uniquely formulated with a combination of high performance self-crosslinking acrylic and polyurethane polymers fused with proprietary resin technologies. This product was developed for use as a DTM over ferrous and non-ferrous metals. Additionally this product may be used over a wide variety of surfaces including wood, concrete, masonry, aged alkyds and various plastics.

Polytec DTM Semi-Gloss can be used under extreme environmental conditions. It offers excellent flash rust, long term corrosion & abrasion resistance. This product also provides resistance to abrasions, stains, moisture and both household & industrial chemicals. It has excellent color & gloss retention, does not yellow, is fast dry and suitable for use in USDA inspected facilities.

### Recommended Uses

Ideal for use on properly prepared and primed structural steel, equipment, metal doors, frames and wrought iron surfaces of all types. It can also be used over properly prepared concrete, masonry, wood, many commercially available plastics and ceramic surfaces. **NOT for use on surfaces exposed to hand oils, lanolin, on kitchen cabinets or table tops. For handrails, or surfaces exposed to hand oils, use the Polytec 5700 series product.**

### Colors

White and Black.  
Bases: H, P, D AND A

### Packaging

One and five gallon containers

### Finish

Semi-Gloss, sheen @ 60° = 50.0% (+/-3.0%)

### Surface Preparation

Remove oil, grease, dirt, loose rust, loose peeling paint or other contaminants that may impair adhesion and affect performance. Glossy or slick surfaces should be lightly sanded. **Passivation coatings applied to galvanized metal must be removed prior to priming. Newly galvanized substrates should be tested for chromates. Refer to SSPC SP-16 for proper testing and surface preparation.**

### Primer

Metal Non-Galvanized:	8600 Polytec Primer
	9600 Protec Metal Primer
Metal Galvanized:	8600 Polytec Primer
	4800 Metal Pro Primer
Aluminum:	8600 Polytec Primer
Concrete/Masonry:	4000 Uniprime
	8000 Carefree Prime-ZALL
Wood:	4000 Uniprime
	8000 Carefree Prime-ZALL

### Application

Brush, roll or spray. Ambient and surface temperatures must be above 55°F and relative humidity below 80%. Clean tools with soap and water.

### Drying Time

Touch: 1 hour  
Recoat: 3 hours

### Coverage

Up to 350 sq. ft. per gallon, depending on porosity and texture of the surface.

### Mill Thickness

Wet = 5.0      Dry = 2.0

### Thinning

Use water sparingly.

### Composition

Titanium Dioxide	23.0%
Extenders	2.4%
<b>TOTAL PIGMENT</b>	<b>25.4%</b>
Proprietary Resin	26.3%
Additives	4.5%
Water	43.8%
<b>TOTAL VEHICLE</b>	<b>74.6%</b>

Weights & Measurements +/-3.0%

Solids by Volume:	38.0%
Solids by Weight:	50.0%
VOC:	<50 g/l
Weight Per Gal:	10.14 lbs.
Viscosity:	100 - 110 KU

### Testing

Adhesion (ASTM D 3359-97)	
on steel panel	0% removal
Prohesion (ASTM D 5894-96)	
on steel panel (1000 hours)	No Corrosion
Humidity Resistance (ASTM D 4587-91)	
on steel panel (100 hours)	10 (no effect)

### Conformance

**SCAQMD** - complies with Rule 1113, Architectural Coatings  
**LEED** - complies with LEED 2009
